## Six Syllable Patterns

Closed Syllable has one vowel and ends with a consonant.
The vowel sound is short.
VC = it
$\mathrm{CVC}=$ hen
CCVC $=$ that
CVCC = jump
CCVCC = sloth
Silent-e Syllable has one vowel followed by a consonant and a silent $e$.
The vowel sound is long. (count back 3)
$\mathrm{VCe}=\mathrm{ice}$
$\mathrm{CVCe}=$ cute
CCVCe $=$ shone
(CVCCe = bathe)
Note: $e$ is very rare as the vowel in a Silent-e Syllable
Open Syllable ends with one vowel.
The vowel sound is long.
$\mathrm{V}=\mathrm{I}$
$\mathrm{CV}=\mathrm{go}$
$C C V=$ she
Vowel Team Syllable has two or more vowels that make one sound.
Vowel sound varies. Refer to Vowel Team chart.
Vowel-r Syllable has one or more vowels followed by an $r$.
The $r$ changes the sound of the vowel.

$$
\begin{aligned}
& a r=/ \mathrm{ar} / \\
& o r=/ \mathrm{or} / \\
& e r, ~ i r, ~ u r=/ \mathrm{er} / \\
& a r \text { after } w=/ \text { or/ } \\
& \text { or after } w=\text { /er/ } \\
& \text { ar and or or suffixes = /er/ }
\end{aligned}
$$

Consonant le Syllable has one or more consonants followed by le.
Although the $e$ is silent, the le make the /ul/ sound.
juggle: - gle $=/ \mathrm{gul} /$
bubble: -ble = /bul/
fizzle: -zle = /zul/

* castle: -stle = /sul/

The Six Syllable Patterns apply to accented syllables. Any vowel in an unaccented syllable says /uh/ (schwa) as in duh.(i can also has a reduced short $i$ sound.)
